

# Creating Wikis

- [Wiki - General Information](#)
- [Four Steps to Your Wiki](#)
- [Wiki - Further Configurations](#)

This chapter will explain how course authors can create Wikis in OpenOLAT before embedding them in a course. Here you will find an illustrated step-by-step instruction as well as information on how to adapt Wikis according to your needs.

The wiki module has been disabled by a system administrator if you can't find neither the Wiki course element nor the learning resource.
