

# Creating Tests and Questionnaires

- [QTI - General Information](#)
- [Five Steps to Your Test, Self-test or Questionnaire](#)
- [Questionnaire Editor QTI 1.2 in Detail](#)
- [Archiving Results of Tests and Questionnaires](#)
- [Test editor QTI 2.1 in detail](#)
- [Change from QTI 1.2 to QTI 2.1](#)

This chapter explains how tests and questionnaires can be created. A step-by-step instruction will support course authors by means of the following table to efficiently work with the test and questionnaire editor. In addition you will get information on how to embed tests and questionnaires in your course and how to archive gained results.

From the OpenOLAT version 11.1 the QTI standard 2.1 is support. Revised features and new question types are available. Further information you find in the corresponding [chapter](#).

Questionnaires are still created in the QTI standard 1.2.
