

# Types of Course Element

In this chapter course authors learn in detail which course elements are available in OpenOlat courses and how to configure them. If you have not yet created a course, follow the instructions in the chapter "[Creating courses](#)" first.

Please note that the tabs in conventional courses and in [learning path courses](#) differ and therefore there may be differences in the descriptions. The tab "Learning path" exists only for learning path courses. The tabs "Visibility" and "Access" exist only for traditional courses.
